

Working With People With Disabilities

The Baltimore County Fire Department and the Baltimore County Commission on Disabilities have provided limited copies of a training program entitled "Working with People With Disabilities" to the Indiana Firefighter Training System.

The hope is that this will help FD's to work more effectively and compassionately with persons with disabilities.

The information is useful to emergency response personnel who work with persons with disabilities in a variety of settings.

If you would like a single FREE copy of the DVD and training material email bgoble@dhs.in.gov
